

BROCHURE

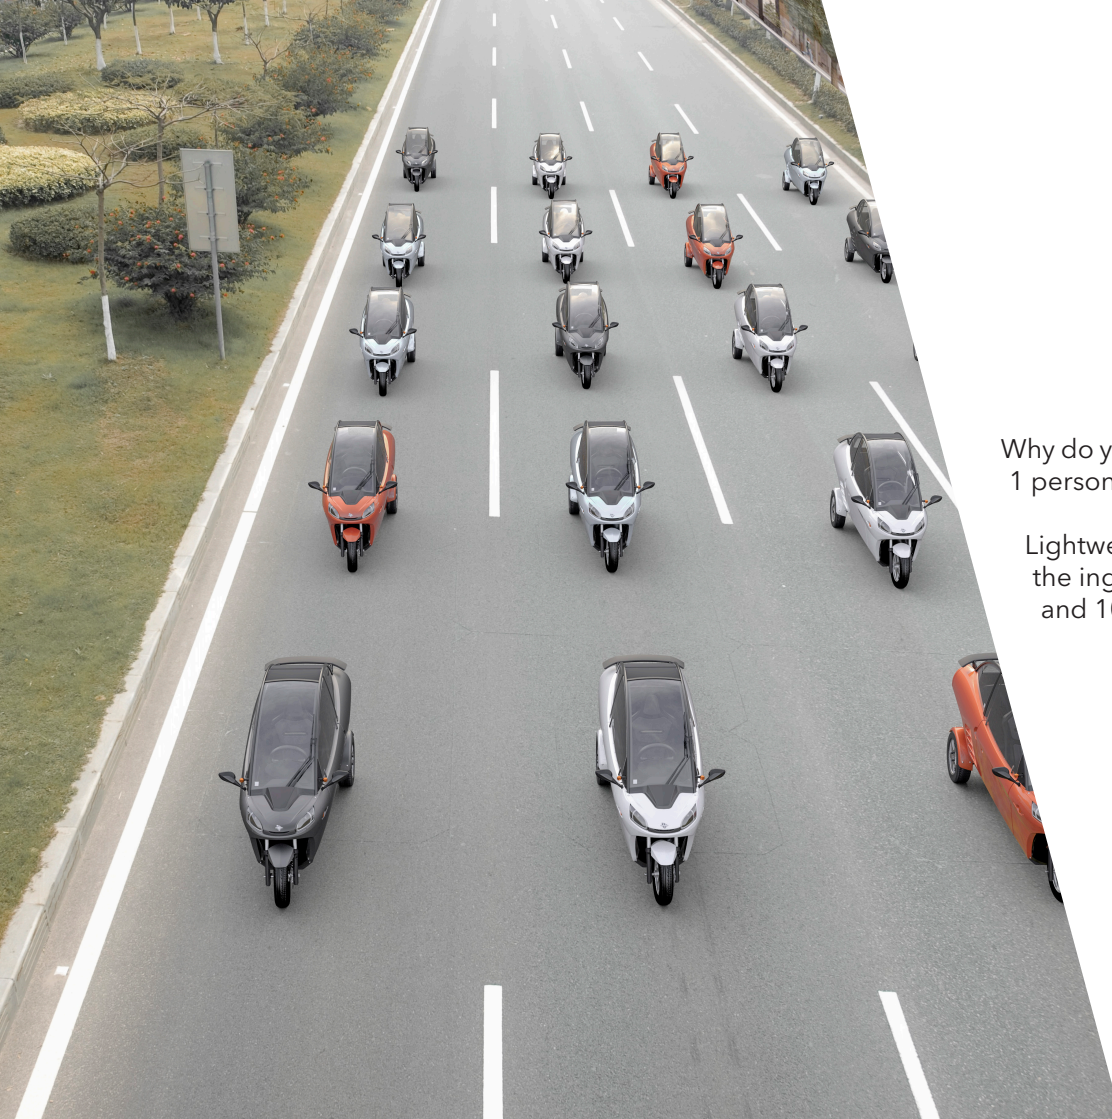

CARVER

Cities continue to grow and are busier than ever. There are more and more large cars on the road. Heavy vehicles are one of the biggest sources of increased CO2 emissions.

The city has less space, yet many people drive a car alone every day. This causes many parking problems and traffic congestion.

2 TONNES OF STEEL
FOR 1 PERSON

Why do you need 2 tonnes of steel to take
1 person on the road most of the time?

Lightweight, compact and electric are
the ingredients to make the city livable
and 100% emission-free again.

**THE NEW
MOBILITY**

TILT YOUR PERSPECTIVE

ABOUT CARVER

The world is in transition. Electric compact vehicles are more relevant than ever. A green and responsible mobility choice with an incomparable driving experience: the Carver.

By developing and producing the best mobility solution, Carver aims to make it possible to drive smarter, cleaner and more efficiently. The safety and comfort of a car combined with the manoeuvrability and size of a scooter.

100% ELECTRIC

With the 100% electric Carver you always drive green and with a small CO2 footprint.

2 PERSONS AND LUGGAGE

Whatever is on your schedule the Carver offers plenty of space for 2 people and 75 liters of luggage.

TILT SENSATION

Glide through the bends thanks to the innovative Dynamic Vehicle Control.

SLIM AND COMPACT

With the compact Carver, parking problems are a thing of the past and you can drive through the narrowest streets with ease.

DRY AND COVERED

Brave the wind in the covered Carver or enjoy the sun with the convertible roof.
