

BROCHURE

CARVER

An aerial, high-angle photograph of a multi-lane asphalt road filled with cars in traffic. The cars are of various colors including red, white, silver, blue, and grey. The road has white lane markings. To the left of the road is a modern building with large glass windows. To the right is a landscaped area with green grass, trees, and a utility pole with a sign. The overall scene depicts a dense urban environment with significant traffic volume.

Cities continue to grow and are busier than ever. There are more and more cars on the road. Heavy vehicles are one of the biggest sources of increased CO2 emissions.

The city has less space and urban logistics are under pressure. This causes more parking problems and traffic congestion.

2 TONNES OF STEEL
FOR 1 PERSON

Have you ever thought about what is the right size car for your business?

Lightweight, compact and electric are the ingredients to make the city liveable and 100% emission-free.

**THE NEW
MOBILITY**

TILT YOUR PERSPECTIVE

ABOUT CARVER

The world is in transition. Electric compact vehicles are more relevant than ever. A green and responsible mobility choice with an incomparable driving experience: the Carver.

By developing and producing the best mobility solution, Carver aims to make it possible to drive smarter, cleaner and more efficiently. The safety and comfort of a car combined with the manoeuvrability and size of a scooter.

100% ELECTRIC

The 100% electric Carver Cargo has a small CO2 footprint and you always drive green and sustainable.

LARGE LOADING SPACE

Be surprised by the 500 litres of loading space in the Carver Cargo.

MANOEUVRABLE

Manoeuvre through the narrowest streets and avoid all roadblocks.

SMALL AND COMPACT

With the compact Carver Cargo, parking problems are a thing of the past and all your stuff close at hand.

DRIVING BILLBOARD

Eye-catching and sustainable delivery with the Carver Cargo as a driving billboard.

ALL DETAILS

Performance

Top speed: 45 km/h
Range: 130 km

Battery

Battery type: NCM LG Energy systems
Battery capacity: 7,1 kWh
Charging 80%: 3 hours
Full charging: 3 hours and 45 minutes

Dimensions

Length: 289 cm
Width: 98 cm
Height: 149 cm
Loadspace: 500 litres
Weight: 330 kg (incl. battery)
Max weight: 500 kg (Carver, driver & loading)

Drive

Max power: 2x2 kW
Max torque: 2 x 100 Nm

Vehicle Classification: L2e-P
Vehicle type: Lightweight electric vehicle

Standard equipped with

Bluetooth audio system
Dynamic driving modes
Sliding windows
Black or White style
